Work experience

as an external iOS Developer:

Accenture

<https://www.accenture.com>

JustBit

<https://www.justbit.it>

The Red One

<https://redone.app>

Skills

- Software development with focus on Object Oriented Analysis and Design
- Understanding of OOP
- Swift for iOS development
- Development tools: Xcode, Sketch
- Understanding of REST, XML, JSON
- Knowledge of SwiftUI and RxSwift
- Regular Expressions
- Knowledge of architecture patterns: MVC, MVP, MVVm, MVVm-C
- Ability to work accurately with a legacy code
- Ability to organize and delegate work to the team accordingly
- Mobile development for iOS, iPadOS and WatchOS
- Understanding S.O.L.I.D. principles
- Business requirements discussion and elicitation
- Application deployment to test and production environments
- Experience with Git, understanding of git-flow
- Good knowledge of Sketch, and the principles of building application interfaces based on it

Relevant Experience

- Mobile development for iOS
- Business requirements discussion and elicitation
- Proposing applicable solutions for the requested functionality, estimating development efforts, duration and cost
- Ongoing demonstration of product builds
- Application deployment to test and production environments

Projects

TIM Business

during 2021

Industry: Utilities

Project Description:

One of the leading applications of the TIM company, intended for people in possession of a VAT number.

<https://apps.apple.com/it/app/tim-business/id589416754?l=en>

Position: iOS Developer

Overall Team Size: 3 iOS developers + QA team

Responsibilities:

- new features development
- bug fixes

Tools & Technologies:

Platform: iOS, iPadOS

Tools: Xcode, Tower, AzureDevOps

Languages & Technologies: Swift, UIKit, CoreAnimation, UserDefaults, FileManager, JSON, REST API, Protocols, GCD, Delegates, Storyboards, Custom XIB, CocoaPods, Git

3rd party libraries: Firebase/Core, KeychainSwift, Alamofire, FirebaseAuth, Lottie-ios

<https://www.timbusiness.it>

ENEL Planet

during 2021

Industry: Utilities

Project Description:

The application is intended for internal use by ENEL technical services. In particular, obtaining data on damaged lines and a large amount of statistics and graphics related to power lines.

Position: iOS Developer

Overall Team Size: iOS Developer + QA team

Responsibilities:

- update app for iOS 15
- bug fixes

Tools & Technologies:

Platform: iOS, iPadOS

Tools: Xcode, Tower, Postman, Azure DevOps

Languages & Technologies: Swift, UIKit, Storyboard, Autolayout, CoreMotion, CoreAnimation, JSON, REST API, UserDefaults, MVVm, Git

3rd party libraries: Alamofire, CryptoSwift, SwipeCellKit

<https://www.enel.com>

iOS technologies

UIKit	Grand Central Dispatch (GCD)
SwiftUI	Apple Push Notification Service (APNS)
MapKit	Local Notifications
ARKit	Socket.io
RealityKit	JSON parsing
SceneKit	REST API
SpriteKit	CoreGPX
AVKit	AVFoundation
MVC	CoreLocation
MVP	CoreAnimation
MVVM	CoreMotion
MVVM-C	CoreML
Storyboards	MessageUI
Autolayout	AppStore Connect
UI from Code	In-App Purchases
Custom XIB	XCTest / UITest
CocoaPods	Firebase
Keychain	Lottie Animation
CoreData	watchOS / tvOS
Realm	
GRDB	

FrontEnd technologies

HTML5	Markdown
CSS3	JavaScript
LESS	TypeScript
SASS	React
SCSS	JSX
DOM	Npm
BEM	Ajax
Flex	REST API
Grid	Redux
Bootstrap	SVG

Tools

- Xcode
- Create ML
- Reality Composer
- Reality Converter
- USDZ files
- GoLand
- Sublime
- Tower
- Parcel
- Postman
- Insomnia
- Sketch
- Figma
- Zeplin
- Maya
- Azure DevOps

La Valle dei Calanchi

during 2021

Industry: Travel, Navigation

Project Description:

The App is for a national park, located in the center of Italy.
Allows you to quickly get acquainted with the sights and places where you can eat and sleep, choose a route.
You can also record and publish your own route.

Position: iOS Developer

Overall Team Size: iOS developer + QA team

Responsibilities:

- new features development
- bug fixes
- estimation

Tools & Technologies:

Platform: iOS

Tools: Xcode, Tower, Zeplin, Insomnia, Wrike

Languages & Technologies: Swift, UIKit, CoreAnimation, UserDefaults, FileManager, JSON, REST API, Protocols, GCD, Delegates, Storyboards, Custom XIB, CocoaPods, Git

3rd party libraries: CoreGPX, Firebase, KeychainSwift, Alamofire, Facebook, GoogleSignIn, GRDB, Kingfisher, MapCache

Skills4Capital

during 2021

Industry: Education

Project Description:

The App is a platform for an innovative learning system developed through the long-term collaboration of Intesa Sanpaolo and Confindustria Piccola Industria to enable small and medium-sized enterprises to access online services and content.

Position: iOS Developer

Overall Team Size: 3 iOS Developers + QA team

Responsibilities:

- new features development
- bug fixes

Tools & Technologies:

Platform: iOS, iPadOS

Tools: Xcode, Tower, Zeplin, Postman, Azure DevOps

Languages & Technologies: Swift, UIKit, Storyboard, Autolayout, CoreMotion, CoreAnimation, JSON, REST API, GCD, APNS, Timer, AVFoundation, UserDefaults, MVVM, Git

3rd party libraries: Firebase, StoreKit, CryptoSwift, TrackingiOS

Personal Interests

- Doing Triathlon
- Running in the mountains
- Fond of Photography
- Go Kayaking
- Wakeboarding
- Like to read Dostoevsky, J.Perkins, J.Ziegler

Management Academy

during 2021

Industry: Education

Project Description:

The Management Academy App is the training channel dedicated to the Chiefs, new Chiefs and Talents of the Intesa Sanpaolo Group.

The App is also available to Intesa Sanpaolo's Customers who wish to provide a selection of exclusive training content to their Chiefs.

Position: iOS Developer

Overall Team Size: 3 iOS Developers + QA team

Responsibilities:

- new features development
- builds preparation/deployment

Tools & Technologies:

Platform: iOS, iPadOS

Tools: Xcode, Tower, Zeplin, Postman, Azure DevOps

Languages & Technologies: Swift, UIKit, Storyboard, Autolayout, CoreMotion, CoreAnimation, JSON, REST API, GCD, APNS, Timer, AVFoundation, UserDefaults, MVVm, Git

3rd party libraries: Firebase, StoreKit, CryptoSwift, TrackingiOS

Buyu

during 2021

Industry: Shopping

Project Description:

The App combines online shopping with in-store shopping by offering services through the Social Showcase platform, specially developed for clothing. The goal is to improve the relationship between buyer and seller, reduce search time for the requested product, increase seller awareness and sales potential, and get the customer to interact with the platform socially and engagingly.

Position: iOS Developer

Overall Team Size: 3 iOS developers + QA team

Responsibilities:

- new features development

Tools & Technologies:

Platform: iOS, iPadOS

Tools: Xcode, Tower, Trello

Languages & Technologies: Swift, MVVm-S, UIKit, Protocols, Delegates, JSON, REST API, Git, CocoaPods

3rd party libraries: ZLImageEditor

<https://buyu.it>

SantOn

during 2020

Industry: Shopping

Project Description:

The application is for an extensive Russian network of luxury plumbing stores. The app is intended for the placement and sale of products. The project's primary goal is to make the purchase more mobile and user-friendly than the existing traditional website.

Position: iOS Developer

Overall Team Size: 3 iOS Developers + QA team

Responsibilities:

- new features development
- bug fixes

Tools & Technologies:

Platform: iOS

Tools: Xcode, Tower, Figma, Trello

Languages & Technologies: Swift, MVVm, UIKit, AVFoundation, CoreData, CoreAnimation, CocoaPods, Git

3rd party libraries: Firebase (+Crashlytics)

<https://santehnika-online.ru>

FoodCost Application

Work in progress ...

Industry: Food & Drink

Project Description:

This App provides a simple solution for catering and hospitality professionals to calculate accurate selling prices and gross profits on individual dishes, food cost and nutrition for recipes and menu items and much more.

Position: iOS Developer

Overall Team Size: iOS developer

Responsibilities:

- start from scratch
- bug fixes
- new features development

Tools & Technologies:

Platform: iOS, iPadOS

Tools: Xcode, Tower, Sketch, Trello

Languages & Technologies: Swift, MVVm-C pattern, UIKit, PDFKit, Autolayout, Custom XIB, Local Notifications, AVFoundation, CoreAnimation, Keychain, CoreAnimation, CocoaPods, Git

3rd party libraries: Firebase Authentication (+Crashlytics)

Cloudy: Weather live forecast

during 2020

Industry: Weather

Project Description:

Simple & accessible weather App, with accurate forecasts by Hour, Day and Week. You can get a weather forecast by your geolocation or by cities that interest you. Also, cities are saved in a list that can always be edited.

Position: iOS Developer

Overall Team Size: iOS Developer

Responsibilities:

- new features development
- builds preparation/deployment
- estimation

Tools & Technologies:

Platform: iOS, iPadOS

Tools: Xcode, Tower, Sketch, Postman, Trello

Languages & Technologies: Swift, MVVm, UIKit, Storyboard, Autolayout, CoreLocation, URLRequest, REST API, JSON parsing, AVFoundation, Concurrency, CoreAnimation, UserDefaults, CocoaPods, Git

3rd party libraries: Firebase (+Crashlytics)

Private photo: Secret gallery

during 2019

Industry: Photo & Video

Project Description:

The mobile application securely stores personal photos and videos using a PIN-code or authorization by Touch / Face ID. You can also make the picture as "favorite", add a comment or share the picture.

Position: iOS Developer

Overall Team Size: iOS developer

Responsibilities:

- new features development
- bug fixes
- estimation

Tools & Technologies:

Platform: iOS

Tools: Xcode, Tower, Sketch, Trello

Languages & Technologies: Swift, MVC, UIKit, Storyboard, Autolayout, CoreAnimation, UserDefaults, FileManager, Keychain, Protocols, Delegates, Git, Custom XIB, CocoaPods, Lottie Animation

3rd party libraries: Firebase (+Crashlytics), KeychainAccess

Car Inspector Pro

during 2019

Industry: Utilities

Project Description:

Application that assists anyone who wants to buy a second-hand car. It allows to perform the check-up process by answering the questions.

Position: iOS Developer

Overall Team Size: 2 iOS Developers + QA team

Responsibilities:

- new features development
- bug fixes
- estimation
- AppStore publication

Tools & Technologies:

Platform: iOS

Tools: Xcode, Tower, Sketch, Jira

Languages & Technologies: Swift, MVVm-C, UIKit, AVFoundation, CoreData, CoreAnimation, CocoaPods, Git

3rd party libraries: Firebase (+Crashlytics)

2D RaceGame

during 2019

Industry: Games - Racing

Project Description:

This is a simple game. You can manage the car using accelerometer and gyroscope. The App has game results (using UITableView) and settings menu with a choice of cars, obstacles and car speed.

Position: iOS Developer

Overall Team Size: iOS Developer

Responsibilities:

- new features development
- bug fixes
- estimation

Tools & Technologies:

Platform: iOS

Tools: Xcode, Tower, Sketch, Trello

Languages & Technologies: Swift, MVC, UIKit, Storyboard, Autolayout, CoreMotion, CoreAnimation, Timer, AVFoundation, UserDefaults, Custom fonts, CocoaPods, Git

3rd party libraries: Firebase (+Crashlytics)

Also I've made other hobby projects: voice memos, cash register for bars (using Realm), browser, calculator and etc.
